DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1-10 and 12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 148600 or Thomas et al. in view of Satoh et al. and further in view of Chigurapati et al. or Olsen.

Applicant argues that EP does not teach the same steps as the instant invention but EP in fact does as is evident from EP. EP does not teach using papain but this is why the rejection was made under 35 USC 103 and not 35 USC 102.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Satoh makes it clear that papain is well known to be used in methods of making protein hydrolyzates by hydrolyzing a defatted soy flour. Since one of ordinary skill in the art would have known at the time that the invention was made that this is true, then it would have been well within the purview of the skilled artisan to use papain in the

process of Thomas or EP. With regard to applicants allegations about the steps done in a different order being non-obvious applicant is directed to MPEP 2144.04 (IV) C where it is clear that the order of the steps are obvious under 35 USC 103.

Claims 1-10 and 12-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chigurapati et al. or Olsen taken with Satoh et al.

Applicant argues that the invention does not use a defatted wheat germ but it is clear from Chigurapati that either defatted wheat germ or defatted soy flour can be used.

Applicant again uses the same argument that all the steps are not taught by Chigurapati, but the above response is reiterated here.

Since all of the remaining arguments are directed to the same arguments as above, applicants attention is drawn to the above response to those arguments.

Claims 1-10 and 12-18 rejected under 35 U.S.C. 103(a) as being unpatentable over Dalboge et al, Edens et al., or Schoenmaker et al. in view of Satoh et al.

Applicant argues the same arguments as above thus the same responses are reiterated here.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
